

Case Study

Barnies Foods fulfil the European Food Information to Consumers Regulation No 1169/2011 with DIGI HC-700

Business Needs

Barnies Foods Ltd, is an independent bakery based in Watton, Norfolk. They produce sandwiches, cakes and bread, and supply to local retailers and filling stations. As a long standing customer of DIGI Europe, Barnies of Watton contacted DIGI Europe to see if we could supply them a machine to help them fulfil the European Food Information to Consumers Regulation No 1169/2011 (FIC).

The regulation (EU) No 1169/2011 is on the provision of food information to consumers. It brings together EU rules on general food labelling and nutrition labelling.

The majority of the requirements of the new legislation had been applied to pre-packed foods from 13 December 2014.

Mandatory nutrition declarations for most pre-packed foods will be coming into force on 13 December 2016.

The four key requirements of the new

regulation listed below, will affect Barnies Foods.

This means that Barnies Foods will have to increase their font size on their label which in turn means that they will need to print and apply labels to both the top and bottom of their packs.

1. For pre-packed foods, allergen information must be emphasised in the ingredients list.
2. For non-prepacked foods (including catering), allergen information must be made available to consumers.
3. Nutrition labelling will be required for most pre-packed foods and this must be presented in a consistent format.
4. A minimum font size for the mandatory information on food labels eg. name of the food, ingredients lists, date marks etc. This also extends to voluntary front-of-pack (FOP) nutrition information.
